## Education

|                                                                                                                                              |                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|
| <b>K.L.N College of Engineering</b><br>B.E in Electronic and Communication Engineering<br>2021-2025<br><b>CGPA: 8.5/10 (all 8 semesters)</b> | <i>Sivagangai, Tamil Nadu</i>            |
| <b>Velammal Bodhi Campus</b><br>Higher Secondary Education<br><b>Percentage: 88.6</b>                                                        | <i>Madurai, Tamil Nadu<br/>2019-2021</i> |

## Technical Skills

**Programming & Query Languages:** Java, SQL  
**Tools & Version Control:** Git, GitHub, Jira, Agile  
**Testing Tools:** Selenium - Java, Playwright - JavaScript  
**Cloud & Database Services:** AWS (S3, Redshift)  
**Concepts:** Object Oriented Programming

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                           |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                   |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Health Index Calculator</b><br><i>Stack: Java, Selenium, Cucumber (BDD), Git, Jenkins</i> <ul style="list-style-type: none"><li>Designed and executed Selenium automation scripts with Cucumber BDD to validate health index calculation scenarios.</li><li>Managed test scripts using Git and configured Jenkins pipelines for continuous automated test execution.</li><li>Performed functional and regression testing to verify formula accuracy across varying input ranges and edge cases.</li></ul> | <i>March 2026</i> |
| <b>Splitwise Expense Calculator</b><br><i>Stack: Java, React, Spring Boot</i> <ul style="list-style-type: none"><li>Performed functional testing of Spring Boot REST APIs to validate expense-splitting logic across multiple users and group scenarios.</li><li>Conducted UI testing on the React front-end to verify accurate balance display and settlement calculations.</li><li>Validated end-to-end integration between the front-end and back-end to ensure data consistency and accuracy.</li></ul>  | <i>June 2025</i>  |

## Achievements

- Star Performer** for the Sprint (3 times) for logging major bugs for Policy Creation and Letter Validation.
- Bright Beginner** for learning the new technology Playwright in a week.
